

AADITYA NARAYAN

AMERICAN UNIVERSITY OF SHARJAH

aadityanagarwal@gmail.com | 056-243-5077 | PQ Dorms American University of Sharjah

JUNIOR II (AUG 2023 – PRESENT)

Computer Science Junior at the American University of Sharjah with a 3.6 GPA. Vice President of the Open Source Club and Fall 2025 Peer Leader with expertise in AI, Data Science, and Full-Stack development. Proven experience delivering technical projects including AI cyber security research, longitudinal traffic data analysis, and Java-based web engineering.

CLUBS AND POSITIONS

- Open Source Club: Vice President(2026-Present)
- Computer Engineering Club: Media Team (2024-Present)
- IEEE RAS Club: Activities Team(2024-2025)
- Sri Lankan Cultural Club: PR Team(2026- Present)
- Member of the AUS Tennis Team

ACHIEVEMENTS

- **Academic Honors:** 3.6/4.0 GPA at the American University of Sharjah.
- **Leadership:** Selected as Peer Leader for Fall 2025.
- **Initiative:** Founded a government-funded Robotics Club in high school.
- **Creative:** Winner of Best Logo Design for the Performing Arts Program.
- **Athletics:** Member of AUS Men's Tennis Team; former State Team representative (2019-20)

KEY SKILLS

- Coding (C++, Java, Python, R)
- Management
- Presentation skills
- Problem Solving

Technical Projects

AAANGY_BIBS | FULL-STACK WEB DEVELOPMENT

July 2024– Present

- Engineered a fully functional web-based gaming platform using Java Servlets and a SQL database for robust user authentication and matchmaking.
- Integrated rudimentary computer graphics and managed server-side logic to ensure seamless real-time interaction between the front-end and the database.

BANGALORE TRAFFIC ANALYSIS | DATA SCIENCE & STATISTICAL MODELING

- Conducted a longitudinal study on 20 years of traffic data, utilizing Random Forest, LDA, and QDA models to classify traffic severity and predict volume trends.
- Performed regression analysis on the Travel Time Index using Box-Cox transformations and Best Subset Selection to identify key variables impacting urban mobility.

AI FOR CYBER SECURITY | RESEARCH PROJECT

- Collaborating on academic research to implement AI-driven security protocols, focusing on the initial design and feasibility of machine learning models for threat detection.
